

THE LAST RAILWAY BUILDING IN BISHOP'S CASTLE NEEDS SAVING **NOW**

Bishop's Castle Railway Society

From this in 1955

to

this in 2017

We've applied to the Heritage Lottery Fund for funding to restore the fabric of the building but to safeguard its future, it needs to be sustainable. We see a role for the building as a community exhibition space, as a meeting venue for local groups and as interpretation centre explaining the role of the railway in the history of the town. To do this we want to install electricity, mains water and drainage and provide an accessible toilet.

HLF funds won't cover all this. Volunteering is already making a significant contribution and the Railway Society has agreed to make a substantial sum available but we'll need more to realise the dream.

We want to raise at least £10,000 so we're asking now if you would consider making a donation towards the successful completion of this project. Everything we receive will be ring-fenced and, in the event of the project not proceeding, can be returned to donors.

Please send cheques made to B.C.R.S. Co Ltd. Ref: Weighbridge
To Peter Mills, Low Water, Riverside Drive, Clun, SY7 8LL.
